Defense

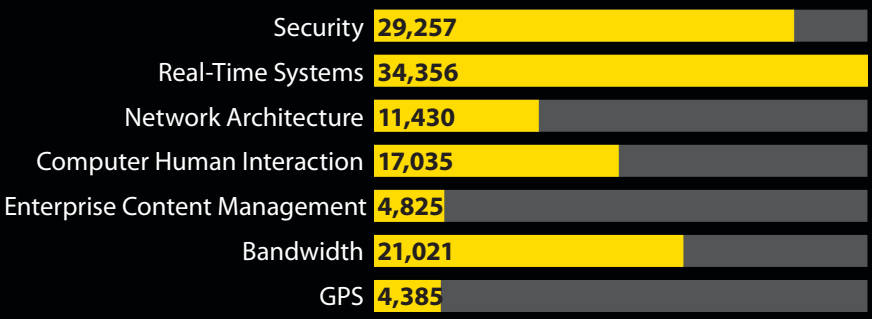
A sampling of some industry relevent keyword results, as well as some highly relevent ACM publication titles and ACM Special Interest Groups covered in the ACM Digital Library.

Key Term Results in ACM Digital Library*



*Total number of full-text articles in the Digital Library

ACM Publications

ACM Transactions on Information and System Security (TISSEC)
ACM Transactions on Modeling and Computer Simulation (TOMACS)
ACM Transactions on Sensor Networks (TOSN)
ACM Transactions on Computer-Human Interaction (TOCHI)
IEEE/ACM Transactions on Networking (TON)
Conference on Computer and Communications Security (Proceedings)
Conference On Wireless Network Security (Proceedings)

ACM Special Interest Groups

SIGCHI Covers human technologies, including design issues, interfaces, societal, and human-computer interactions.

SIGMOBILE Scope includes the mobility of systems, users, data, and computing.

SIGSAC Addresses all aspects of information and system security, encompassing security technologies, secure systems, security applications and security policies.
