

2013 Computing Reviews Pricing Guide

A daily snapshot of what is new and hot in computing.

Written by computer scientists, who are authorities in their fields, our reviews cover articles, conference papers, books, and other published materials in all areas of computer science. All reviews are edited for style, and a board of editors evaluates their content.

Computing Reviews gives you the overview needed to identify the most essential articles and books.

- ◆ Insightful reviews published daily
- ◆ Over 1,000 reviewers qualified by the ACM
- ◆ 18 editors who check reviews to ensure accuracy and excellence
- ◆ Weekly Editor's Pick and recommendations
- ◆ All major computer science publishers covered
- ◆ 286 journals reviewed
- ◆ Link though to library subscriptions for full-text
- ◆ Fully indexed and integrated with the ACM Digital Library
- ◆ Searchable and browsable archives back to 1985

Full-text access to the Computing Reviews service, including the complete archive of over 30,000 reviews, is an add-on to the ACM Digital Library annual license, although significant discounts are available for ACM Digital Library subscribers.

ACM Tiers	2013 Tier List Prices	2013 Consortium Discount Pricing (50%)
1	\$460	\$230
2	\$2,590	\$1,295
3	\$2,878	\$1,439
4	\$3,030	\$1,515
5	\$3,190	\$1,595

Computing Reviews is a collaboration between the ACM and ThinkLoud.
